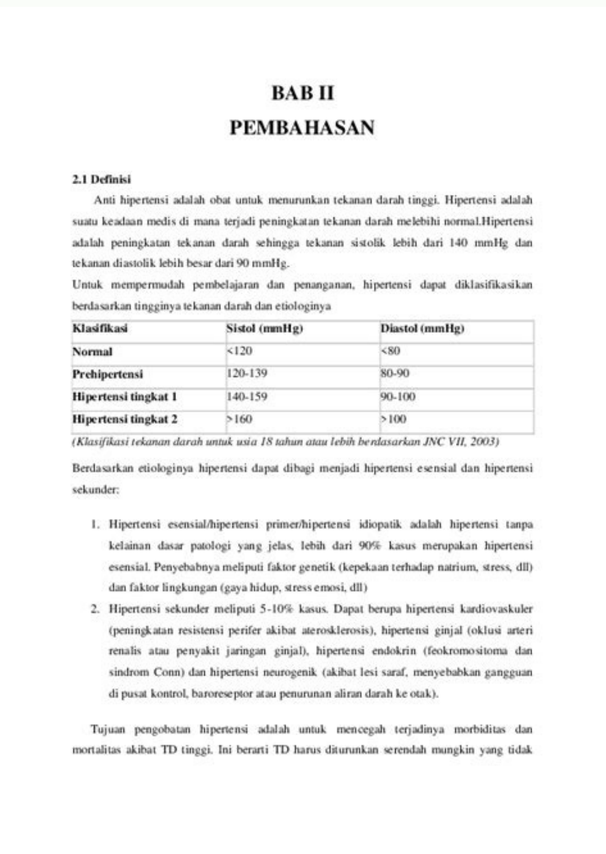
Definisi neoplasma pdf



BAB II
PEMBAHASAN

2.1 Definisi

Anti hipertensi adalah obat untuk menurunkan tekanan darah tinggi. Hipertensi adalah suatu keadaan medis di mana terjadi peningkatan tekanan darah melebihi normal.Hipertensi adalah peningkatan tekanan darah sehingga tekanan sistolik lebih dari 140 mmHg dan tekanan diastolik lebih besar dari 90 mmHg.

Untuk mempermudah pembelajaran dan penanganan, hipertensi dapat diklasifikasikan berdasarkan tingginya tekanan darah dan etiologinya

Klasifikasi	Sistol (mmHg)	Diastol (mmHg)
Normal	<120	<80
Prehipertensi	120-139	80-90
Hipertensi tingkat 1	140-159	90-100
Hipertensi tingkat 2	>160	>100

(Klasifikasi tekanan darah untuk usia 18 tahun atau lebih berdasarkan JNC VII, 2003)

Berdasarkan etiologinya hipertensi dapat dibagi menjadi hipertensi esensial dan hipertensi sekunder:

1. Hipertensi esensial/hipertensi primer/hipertensi idiopatik adalah hipertensi tanpa kelainan dasar patologi yang jelas, lebih dari 90% kasus merupakan hipertensi esensial. Penyebabnya meliputi faktor genetik (kepekaan terhadap natrium, stress, dll) dan faktor lingkungan (gaya hidup, stress emosi, dll)
2. Hipertensi sekunder meliputi 5-10% kasus. Dapat berupa hipertensi kardiovaskuler (peningkatan resistensi perifer akibat aterosklerosis), hipertensi ginjal (oklusi arteri renalis atau penyakit jaringan ginjal), hipertensi endokrin (feokromositoma dan sindrom Conn) dan hipertensi neurogenik (akibat lesi saraf, menyebabkan gangguan di pusat kontrol, baroreseptor atau penurunan aliran darah ke otak).

Tujuan pengobatan hipertensi adalah untuk mencegah terjadinya morbiditas dan mortalitas akibat TD tinggi. Ini berarti TD harus diturunkan serendah mungkin yang tidak

Definisi neoplasma ganas. Definisi neoplasma jinak.

(Syeem Yaah ...). Because we know, we are prevented. I help with us to prevent degenerative diseases. S. Generally, growth is slow and harmless to the body. You can download the paper by clicking on the ³ button above. - Wales... Neoplasm is a new growth of abnormal cells, for a long time, can become cancer. Hickey., & J. N. Marrs (Eds.), Nurse Advisor, Ãa Oncology de Mosby, a complete guide to practice (PP 14-30). Based on basic health research data (RiskesDAS) ³ 2013, nationally, the prevalence of cancer in the population ³ all ages in Indonesia was 1.4% or an estimated around 347,792 people. U.S. USA: World Cancer Research Fund in partnership ³ with the American Cancer Research Institute, D & Edward Helen³s. Cancer is caused by changes in the nature and mutation ³ genes of normal cells in new abnormal cells (Porh & Matfin, 2009). Unfortunately, growth is not the expected growth of growing by the body, but grew abnormal and different types of stem cells (the basis of the rebel ... hehe "* Kiding ME). FerifisiologÃa del ncer. Cancer is a disease that is difficult to detect in the initial phase, generally known after complaints and symptoms arise. Because it often does not cause symptoms, incidents of disability and death of the disease are growing. (2009). MetÃ stasis The ability to build a growth of the secondary tumor in a new location ³ away from its primary tumor, the spread ³ cancerous cells in other ³ organs through sangu vessels and table lymphs, we know what neoplasia is, what is called cancer or malignant cancer. Once we know the term, what we have to do is take care of ourselves and begin to detect the ³ of cancer. Factors can affect the growth of cancer cells. NorteamÃ© rica: Lippincott Williams & Wilkinsch for information on cancer cases can be reviewed on the Rikedas website of the Republic of Indonesia and WHO. This is due to a carcinogenic substance that becomes an intermediary with the changing character of the cell. Malignant abnormal cell growth with ability to attack, metastasis and repeat, therefore malignant tumor or cancerUgenus. China: Mosby Elseiver Matfin, Glenn, Porth, Carol Mattson. Concept of pathophysiology of altered health status. The tumor may be benign (benign) or malignant (malignant) Due to its abnormal cell division³ but not metastasis or spread to surrounding tissue, also called benign tumor. TERMS OF DEFINITION Malignancy Growth of abnormal (abnormal) body cells that may be present in various parts of our body. Library (if friends want to find a reading source):American Institute for Cancer Research ³ (1997).Food, Nutrition³ and Cancer Prevention³ a Global Perspective. Loading PreviewSorry, the preview is not currently available. Newton, M. 8.Âª EdiciÃ ³ n AttrÃ© to worry, to share. The carcinations³ self-derived genes are related to genetic and temporal immune factors derived from the environment and can be radiation, exposure ³ harmful chemicals, tobacco consumption habits, alcohol consumption and unhealthy lifestyle (Klemm & Hurst, 2009). The very case of cancer can be caused by the stimulation ³ external factors such as high fat diet, cigarettes, air pollution ³ and the influence of internal factors such as non-stability.
